

include/monte_carlo
/models/action.h

```
graph TD; A["include/monte_carlo  
/models/action.h"] --> B["memory"]; A --> C["ostream"];
```

The diagram illustrates a C++ header file's dependencies. A top box labeled 'include/monte_carlo/models/action.h' has two blue arrows pointing downwards to two separate boxes: 'memory' on the left and 'ostream' on the right. This indicates that the 'action.h' header file includes both the 'memory' and 'ostream' headers.
