

examples/monte_carlo
/tic_tac_toe/include
/tic_tac_toe/models/move.h

```
graph BT; A["examples/monte_carlo<br>/tic_tac_toe/src/factories<br>/tic_tac_toe_factory.cpp"] --> C["examples/monte_carlo<br>/tic_tac_toe/include<br>/tic_tac_toe/models/move.h"]; B["examples/monte_carlo<br>/tic_tac_toe/src/models<br>/move.cpp"] --> C;
```

This diagram illustrates the relationship between three source files in a project. At the top, a gray-shaded box represents the header file `examples/monte_carlo/tic_tac_toe/include/tic_tac_toe/models/move.h`. Below it, two white boxes represent source files. The left box, `examples/monte_carlo/tic_tac_toe/src/factories/tic_tac_toe_factory.cpp`, and the right box, `examples/monte_carlo/tic_tac_toe/src/models/move.cpp`, both have blue arrows pointing upwards to the header file, indicating that they include it.
