

testing::Test

```
classDiagram
    class testing__Test["testing::Test"]
    class sophia__monte_carlo__tic_tac_toe__model_tests__TicTacToeModelsFixture["sophia::monte_carlo::tic_tac_toe::model_tests::TicTacToeModelsFixture"]
    sophia__monte_carlo__tic_tac_toe__model_tests__TicTacToeModelsFixture --|> testing__Test
```

The diagram illustrates a class hierarchy. At the top is a white box representing the `testing::Test` class, which is divided into three horizontal sections. The top section contains the text `testing::Test`. Below it is a gray box representing the `sophia::monte_carlo::tic_tac_toe::model_tests::TicTacToeModelsFixture` class, also divided into three horizontal sections. The top section of the gray box contains the text `sophia::monte_carlo::tic_tac_toe::model_tests::TicTacToeModelsFixture`. Two blue arrows point upwards from the top section of the gray box to the bottom section of the white box, indicating that `sophia::monte_carlo::tic_tac_toe::model_tests::TicTacToeModelsFixture` inherits from `testing::Test`.
