

include/monte_carlo
/models/action.h

```
graph TD; A["include/monte_carlo  
/models/action.h"] --> B["memory"]; A --> C["ostream"];
```

A diagram illustrating a C++ header file's dependencies. At the top, a dark gray box contains the text 'include/monte_carlo' followed by a line break and '/models/action.h'. Two blue arrows originate from the bottom edge of this box. The left arrow points to a light gray box labeled 'memory'. The right arrow points to a light gray box labeled 'ostream'. This visualizes that the 'action.h' header file includes definitions for 'memory' and 'ostream'.

memory
