

examples/monte_carlo
/tic_tac_toe/include
/tic_tac_toe/models/move.h

```
graph BT; A["examples/monte_carlo  
/tic_tac_toe/src/factories  
/tic_tac_toe_factory.cpp"] --> C["examples/monte_carlo  
/tic_tac_toe/include  
/tic_tac_toe/models/move.h"]; B["examples/monte_carlo  
/tic_tac_toe/src/models  
/move.cpp"] --> C;
```

A diagram illustrating file dependencies. At the top is a gray box containing the header file path: examples/monte_carlo /tic_tac_toe/include /tic_tac_toe/models/move.h. Below it are two white boxes. The left box contains the source file path: examples/monte_carlo /tic_tac_toe/src/factories /tic_tac_toe_factory.cpp. The right box contains the source file path: examples/monte_carlo /tic_tac_toe/src/models /move.cpp. Two blue arrows point from the left and right boxes up to the header file box, indicating that both source files include the header file.
